

ROTATABLE APPLICATOR TIP FOR A CORRECTIVE TAPE DISPENSER

ABSTRACT OF THE DISCLOSURE

A correction tape dispenser includes a housing with a pair of receiving holes and a supply spool and a take-up spool are disposed within the housing. A carrier ribbon has a first end wound about the supply spool and a second end wound about the take-up spool. An applicator tip is at least partially disposed within the housing and includes a platform with a front edge, a rear edge, a first side edge, a second side edge, a top surface and a bottom surface. A first wall and a second wall extend up from the platform. The carrier ribbon is disposed on the top surface, around the front edge, and on the bottom surface between the first side edge and the second side edge. The platform includes a slot that defines a first leg and a second. A first post extends laterally out from the first side edge, and a second post extending laterally out from the second side edge, the first post and the second post being rotatably disposed within the receiving holes of the housing.
